School Bus Solar Solutions

PowerFilm Solar delivers custom solar solutions optimized for the unique needs of school buses, enhancing reliability, passenger comfort, and reducing costly maintenance and downtimes.

Our solar solutions:

- Charge auxiliary batteries to power safety lights, displays, and communication systems.
- Power wheelchair lifts and accessibility equipment, ensuring reliable operation.
- Reduce engine idle time and save fuel by powering auxiliary systems with solar energy.
- Extend battery life for onboard electronics, safety signals, and GPS tracking.

PowerFilm designs, engineers, and assembles our solar panels in the USA, ensuring lasting durability, optimal performance, and easy installation with minimal maintenance.

Our solutions are engineered to withstand the demands of daily school routes, providing consistent performance year-round.

Count on PowerFilm Solar to give your school bus fleet a competitive edge with custom solar solutions that reduce costs, improve safety, and minimize downtime.
