

LIGHTSAVER™
RELIABLE SOLAR POWER

Lightweight Portable Solar Charger

About LightSaver

We took over 30 years of experience designing solar solutions for businesses and the United States Military and built a product perfect for consumers.

Solar chargers on the market are bulky and lack energy storage. The LightSaver's high performance electronics and compact design put it in a class by itself.

The LightSaver features a state-of-the-art roll out thin film solar panel to keep your devices powered wherever you are. Thin film solar helps make the LightSaver lighter and more portable than other solar chargers on the market.

Industrial grade fabric will stand up to the elements and the incredibly durable solar panel make the LightSaver insanely reliable and ridiculously dependable.

Weighing in at a mere 4.9 ounces, the LightSaver can easily be mounted on a backpack and charged on the go. It's perfect for a weekend hike, month long trek or being stowed for emergencies.

In our fast paced mobile world, power is no longer an option but a necessity. With cutting edge technology, a sleek design and industry-leading durability, the LightSaver keeps you connected.

Specifications

Size: 7.8" x 1.5"
