Military Solar Solutions

PowerFilm offers a wide range of solar panels for military use including custom sizes, fabrics, encapsulations and connectors. We use multiple PV technologies including amorphous silicon, crystalline silicon and gallium arsenide.

Man Portable

PowerFilm solar panels are lightweight, durable and can be used to power all the war fighter's individual or small unit C4ISR - Command and Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance.

Vehicle

PowerFilm solar panels support silent watch, long-term motor pool storage, auxiliary power needs, lights, unmanned ground vehicle batteries and unmanned aerial vehicle batteries.

Basing

Ideal for communication hubs, first aid stations, maintenance bays or any large area needing cover and solar power, the PowerShade is the operational choice of military units.
