About Soltronix Semi-Flexible Solar Panels

Soltronix solar panels are designed and engineered to be the most durable semi-flexible crystalline silicon panels on the market. They are made from high-efficiency SunPower solar cells and paired with a proprietary encapsulation system that ensures the best durability and environmental protection. All panels are tested at the end of the manufacturing process to ensure they exceed the advertised performance.

PowerFilm Solar, the US-based company behind the Soltronix brand, brings over 200 combined staff-years of experience in innovative solar design, engineering and assembly of custom products across multiple technologies.

Soltronix Products

- 27W Panel with Integrated Charge Controller
- 50W Panel with Integrated Charge Controller
- 110W Panel with Integrated Charge Controller
- 110W Panel with External Charge Controller
- Custom sizes and designs available
