Transportation Solar Solutions

PowerFilm Solar delivers custom-designed total solar solutions that meet the specific needs of commercial fleets, increasing truck reliability and reducing costly downtimes.

Our solar solutions:

- Support APUs and EPU's, reducing fuel use and lowering operating costs.
- Charge starting batteries to help drivers avoid costly delays and breakdowns.
- Top up liftgate batteries for smooth deliveries every time.
- Reduce engine idle time and save diesel.
- Extend TRU battery life and reduce fuel consumption with a steady charge.
- Power telematics systems to ensure continuous tracking and monitoring.

PowerFilm designs, engineers and assembles our solar panels in the USA, building them for lasting durability, optimal performance, and easy installation with minimal maintenance.

Count on PowerFilm Solar to give your fleet a competitive edge through custom solar solutions tailored to your operations.

Contact us for more details, and let's get started on your solar solution today.
