

## LightSaver Max Accessories

### USB-A-C Cable (USBAC)

Charge your LightSaver Max via the USB-C input from a USB charger (Note: chargers of 2A or greater advised for optimal charging speeds) and stay powered up wherever you are (this cable comes standard with the LightSaver Max).

### PowerChain Cable (LSM12VDC2)

With the PowerChain you can connect two LightSaver Max Portable Solar Chargers together to charge higher power electronics including drones, larger laptops and many others.

### 12V Input Cable (LSM12VIN)

Charge your LightSaver Max from the 12V power port in your car and stay powered up wherever you are or connect an additional PowerFilm Foldable or Rollable panel to charge up your Max more quickly (this cable comes standard with the LightSaver Max).

### Microsoft Surface Adapter (LSM-SURFACE)

With this adapter you can charge your Microsoft Surface directly from the LightSaver Max Portable Solar Charger's 12V output.

### 12V Output Cable (LSM12VOUT)

Charge electronics that plug into a car's 12V power port with your LightSaver Max (this cable comes standard with the LightSaver Max).
